

# Stair Nosings

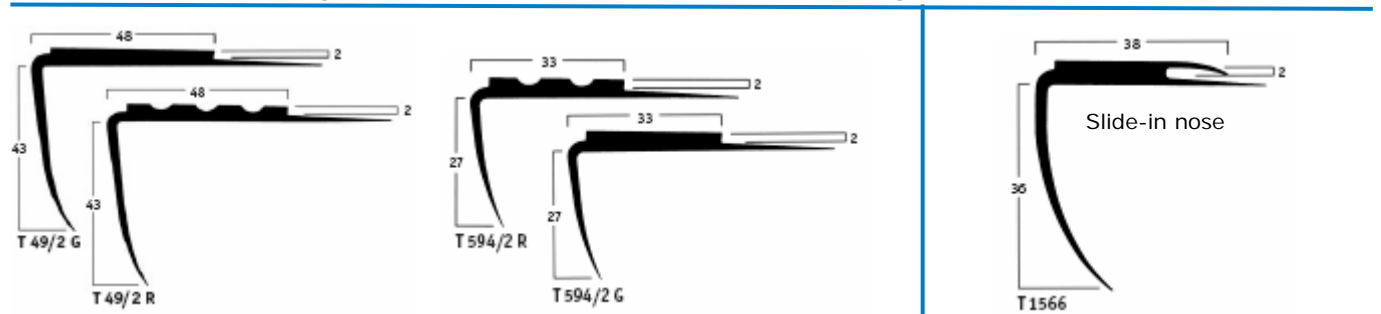

**Production in Germany with most modern technology guarantees:**

- highest quality and exact dimensioning of the stair nosings,
- new formulation for extreme **high abrasion resistance** and **high slip resistance**,
- easiest installation, due to optimal definition of product density and hardness.

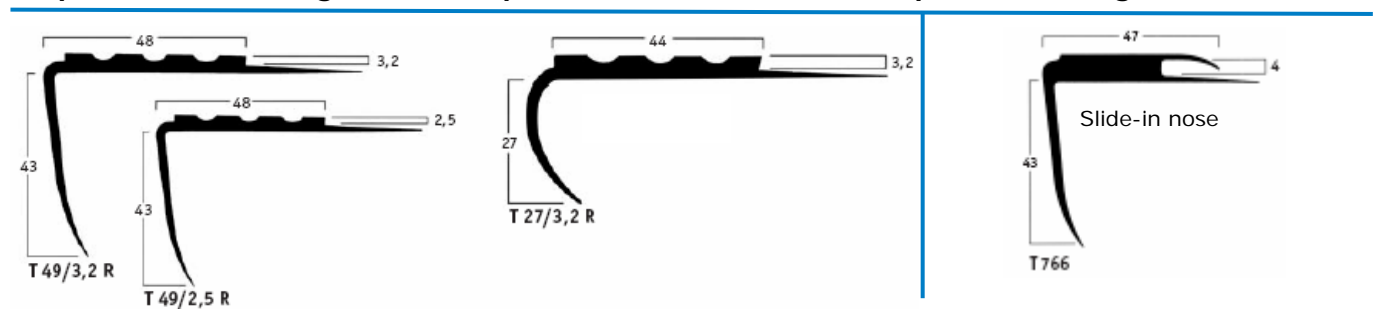

**Raipolen stair nosings are:**

- **easy to process and certainly to stick** together by heaviest demands in measure and exact contouring. The profile length of 4.5 m provides low offcut,
- **extremely resilient, nonabrasive and long-lastingly** by use of only high-quality Pvc ways at low bulking agent quota,
- **for reasons of health quite safe**, no heavy metals.

## Raipolen Stair Nosings made for pvc- and linoleum-floorings.

## Raipolen Stair Nosings made for pvc-, linoleum- and needle-punch flooring

## Raipolen Basic-Colours
